Brief description of problem or concern: ECSD / FPL

#37

ESCO / FPL

How does a Health fund finance 6 million taxpayer dollars between 2 non-government corporations?

How does a Health fund finance an energy project?

The payback calculations were done by ESCO/FPL energy experts

How does these "experts" miscalculate by over 40% on the payback and savings

How does after 5 years and over 2.6 million short on repayments is the loan extended for another 5 years

Why was not the note called in and defaulted back to FPL

If it was the 2.6 million should of gone to renewable projects on our county buildings

The manataince building on Tallevast comes to mind with a perfect roof angle. At least you would see a return every day the sun is out.

Why was not the County made whole again after 5 years?

Who gave you the right to extend a bad loan?

This type of bad governess is unacceptable to the taxpayers

We are asking this board to review any and all contracts, sign off on them before they are ever put on the agenda for your approvable.

The lack of integrity with taxpayer's money is not to be tolerated anymore. P E R I O D !!!
