Background Discussion

On July 31, 2017, the Florida Department of Management Services entered into Alternative Contract Source No. 43230000-NASPO-16-ACS, utilizing Master Contract No. AR2472. The contract, which is valid through September 15, 2026, provides a cooperative purchasing vehicle for procuring cloud solution services.

Since July 2024, the Public Safety Department has utilized this cooperative contract to procure Peregrine Technologies cloud solution services through Carahsoft Technology Corporation.

The Public Safety Department is requesting approval to issue a purchase order for the annual renewal and expansion of the County's existing Peregrine Technologies cloud-based Operational Intelligence platform. The platform provides a Criminal Justice Information Services (CJIS)-compliant environment for integrating, analyzing, and securely sharing operational public safety information across multiple County systems.

The purchase includes continued use of the County's existing Peregrine Foundation platform and expanded capabilities supporting Emergency Management, Emergency Medical Services (EMS), Emergency Communications Center (ECC), Community Health, Beach/Pool Operations, and other operational datasets. These capabilities improve situational awareness, operational coordination, analytics, and decision-making while leveraging existing County technology investments.

Approval of this purchase order will allow the County to continue using the platform without interruption and implement the additional integrations identified in the current Statement of Work.

Use of the Florida Department of Management Services cooperative contract streamlines the procurement process, provides competitively established pricing and terms, and enables the County to continue procuring these services efficiently.

The Public Safety Department estimates the annual expenditure under this purchase order to be approximately \$407,500 annually. The department is requesting that funding for this purchase order be directly associated with the Board of County Commissioners (BCC)-approved departmental budget to facilitate the timely processing of services on an as-needed basis. Any deviation from approved funding will require a budget amendment to be brought before the BCC for approval prior to processing.
