## POPULATION ESTIMATE: MANATEE COUNTY

Jeff Miller, Long Range Planner, Planning and Development Department, explained that each year the University of Florida does population estimates for the various counties of Florida; that these become official State estimates which are used by the State and by the Federal Government for various State and Federal Grants Programs, including Revenue Sharing. The University of Florida estimates for July 1, 1976 was originally 123,992 for Manatee County. The Planning Department has negotiated on a revised figure of 126,160, which is still an unsatisfactory figure from their viewpoint as they feel the population for Manatee County is about 138,000 at this time. He recommended that Douglas Widmer, the designated census contact for Manatee County, be authorized to sign the revised population estimate, sent down by the University of Florida, to insure continuation of the Revenue Sharing Program; that the Chairman sign a letter, on behalf of the Board, directed to Lt. Governor James Williams, Department of Administration, advising that execution of the revised population estimates does not indicate approval, and requesting that a more reasonable population estimate be made for Manatee County.
